Situation Report of the 17th Ebola Virus Disease Outbreak / DRC

SitRep N°181/MVE-BDBV/11/11/2026

Reporting date: November 11, 2026 Publication date: November 12, 2026

HIGHLIGHTS (last 24 hours)

Over the past 24 hours, eighty-three (83) new confirmed cases and 38 confirmed deaths, including 28 community deaths and 10 deaths within treatment centers, have been reported. The new cases were recorded in Ituri (37), North Kivu (41), and Haut-Uélé (5). A total of 647 new samples were analyzed in the laboratories that submitted their data; 83 of these samples tested positive for the Bundibugyo virus, representing a positivity rate of 12.8%. One new health zone has been affected in the past 24 hours.

Summary of key points from the last 24 hours

For the day of November 11, 2026, **eighty-three (83)** new confirmed cases of Ebola virus disease (EVD) were notified in three provinces: Ituri (37 cases), North Kivu (41 cases) and Haut-Uélé (5 cases), representing an increase of 15.3% compared to the previous day.

Among these cases, 28 community deaths were reported (9 in Ituri, 17 in North Kivu, and 2 in Haut-Uélé). In addition, 10 confirmed deaths were recorded in Ebola Treatment Centers (3 in Ituri and 7 in North Kivu), bringing the total number of confirmed deaths reported during the period to 38.

Furthermore, 14 patients (10 in North Kivu, 1 in Haut-Uélé and 3 in Ituri) were declared cured after obtaining two negative results in the control test for Ebola Virus Disease.

Since the start of the epidemic, the DRC has recorded 11,197 confirmed cases, including 5,471 deaths, representing an overall case fatality rate of 48.9%. Ituri remains the epicenter of the epidemic, accounting for 69.3% of cumulative confirmed cases and 44.6% of new reported cases, while North Kivu represents 49.4% of new cases and has a case fatality rate of 55.2%, higher than the national average.

A new health zone has been affected in the last 24 hours

Thus, 68 out of 178 health zones (38.2%), spread across eight provinces, have been affected since the start of the epidemic, namely: Ituri, North Kivu, Haut-Uélé, Tshopo, South Kivu, Bas-Uélé, South Ubangi and North Ubangi.

1. COORDINATION

1.1. Main Actions

• Support for response activities in the provinces **2.**
RESPONSE ACTIONS BY PILLAR

2.1. Epidemiological surveillance

2.1.2. Main Actions

As of November 11, 2026, 4,429 alerts had been reported in the six provinces that submitted their data (Bas-Uélé, Ituri, North Kivu, South and North Ubangi, and Tshopo), including 4,267 alerts of living persons and 162 of deaths; 4,413 were verified (99.6%). Of these, 525 (11.9%) were validated as suspected cases and 3,888 (88.1%) were invalidated. Of the 522 suspected cases investigated, 267 were transferred to treatment centers (Table 3).

As of November 11, 2026, a total of 38,645 contacts were under follow-up in the five provinces that reported contacts to follow up, of which 31,255 were seen in the last 24 hours, representing a follow-up rate of 80.9%, below the required threshold of 95%.

Table 4. Status of contact tracing by province, as of November 11, 2026

Province	Contacts under follow-up	Contacts viewed	tracking rate
Ituri	16,447	13,738	83.5%

Total	38,645	31,255	80.9%

2.2. Update on checkpoint and point of entry (PoE/PoC) activities

2.2.1. Main actions

Hundreds of thousands of passengers are being screened cumulatively across the various provinces. For November 11, 2026 alone:

- **Ituri:** 147,569 passengers passed through (96% screened).
- **North Kivu:** 96,217 passengers passed through (97% screened).
- **Tshopo:** 22,178 passengers passed. •

Haut-Uélé: 25,225 passengers passed (98% screened).

- **Bas-Uélé:** 3,269 passengers passed (98.2% screened). • **South**

Kivu: 8,427 passengers passed.

Machine Translated by Google

Minimal but persistent refusal rates (linked to rumors that agents are seeking money or that the wash water contains the virus) are documented and addressed through awareness campaigns.

Challenges : Non-functionality of some PoE/PoC due to insecurity (e.g. Avakubi in Tshopo or Butuhe in North Kivu), strikes or payment delays, and lack of adequate isolation infrastructure in several ports and barriers (particularly in South Kivu).

Table 5. Status of key PoE/PoC indicators by province, as of November 11, 2026

2.3. Laboratory

2.3.1. Main actions

- **Ituri:** 308 samples received and tested in total for the day, with an overall positivity of 12.2% (records and new samples combined).
- **North Kivu:** 311 samples received in total, of which 308 were analyzed (3 in progress). 10% for the 206 new samples, 15% for the 39 control samples (re-samples), and 27% for the 63 samples from deaths.
- **Tshopo :** 8 new suspected Ebola cases collected, 23 samples received, 8 negative cases re-collected and 7 Positive cases were re-sampled for virological monitoring. 0 new confirmed cases validated today.

Machine Translated by Google

• **Challenges:** Reagent shortage (MVE buffer) and pre-shortage of diesel fuel for incinerator operation and of the generator

Haut-Uélé: 19 new samples analyzed: 5 positive and 14 negative, 5 follow-up samples: all negative. Daily positivity rate: 26.3% (for an overall epidemic rate of 19.5%).

• **Bas-Uélé:** 1 whole blood sample received and analyzed (returned negative), 0 swabs, and 1 sample deferred

2.4. Infection Prevention and Control (IPC/EDS)

2.4.1. Main actions

• **Haut-Uélé :** 100% of rings opened around the confirmed cases of the day, 100% of identified households decontaminated (2/2 in Pawa) and 100% of planned healthcare facilities (ESS) decontaminated (2/2).
Decontamination carried out around the Pawa CTE and a (mobile) vehicle in Boma Mangbetu.

• **Bas-Uélé:** Monitoring and support of 13/13 ESS in 3 ZS (Buta, Ganga, Viadana). Briefing of 33 healthcare providers (100%) and 7 hygiene workers (100%) on PPE, waste management, sorting and hand washing.

South Ubangi: Re-evaluation of the scorecards of the Miluna Hospital Center (CH) (improved from 47% to 72.7%) and the Mondosa Health Center (CS) (improved from 3.5% to 32.3%). Development of operational improvement plans and monitoring through mentoring.

North Ubangi : Evaluation of the health structures of Wapinda (CS Wapinda 1 with a score of 22.5% and CS Wapinda 2 with 16.1%) and briefing of 6 health professionals (PPL) on hand hygiene and waste management.

Ituri: 45 households and 6 health facilities decontaminated (with input shortages reported in Mandima and Mambasa, as well as a strike in Tchomia).

North Kivu : 2 rings opened, 14 out of 17 identified health establishments (82.4%) decontaminated, and 9 out of 21 identified households decontaminated (42.9%). A significant shortfall was noted in the direct provision of decontamination kits to households.

Tshopo : Evaluation of scorecards for the Yahweh Shama Health Center (27.4%) in the Makiso Health Zone and the Jama Community Health Center (9.7%) in the Kabondo Health Zone. Monitoring and support of 17 health centers in 5 health zones (232 providers briefed on standard precautions).

• **Challenges:** Lack of access to drinking water and storage capacity (48 hours) in emergency medical services (EMS), low proportion of personnel trained in first aid, and absence of triage areas. •

Safe and dignified burials (SDB)

• **Ituri :** 79 EDS alerts received, 61 carried out (77%), 58 bodies swabed, with 9 failures and 14 postponements.

• **North Kivu :** 84 alerts received, 66 blood donations carried out (with 72 bodies collected, 7 bodies swabed, and some failed collection attempts), and 29 postponements for the following day

• **Tshopo:** 7 EDS alerts received, 0 EDS carried out (7 failures), 0 swabé bodies and 3 reports.

• **Haut-Uélé :** out of 6 death alerts, 4 EDS were carried out (2 in Isiro, 1 in Pawa, 1 in Wamba) and 2 bodies were swabés (1 in Wamba, 1 in Isiro).

• **Bas-Uélé:** 1 complete EDS (Emergency Response System) carried out in the Buta Health Zone (with 11 swabs carried out in the Congo Health Zone). 0 EDS carried out in Ganga and Viadana out of 3 alerts received

Challenges: 16/20 priority social and solidarity economy (SSE) facilities without a functional sorting area, 20/20 SSE facilities without filled mattresses, 17/20 SSE facilities without a 72-hour water supply, and a lack of compliant waste management areas.

2.5. Holistic care (HCC)

2.5.1. Main actions

• **Ituri :** Overall occupancy rate of 38% (51% for suspected cases and 26% for confirmed cases). Tensions
Receptions are reported in several CTE/CTs (Nyankunde, Mambasa, Kilo, Lolwa, Mangala, Mandima and Biakato), 89 new admissions, 683 cumulative recoveries and 8 deaths (4 of which are confirmed) recorded in the

Machine Translated by Google

structures. And 366 out of 380 patients (96%) received a hot meal, and special monitoring is provided for infants on specific diets (LNPE/SLM) and cases of malnutrition (MAS/MAM).

North **Kivu :** 14 patients reported, 604 new admissions (132 confirmed and 472 suspected), and 200 discharges (including 10 recoveries, 181 non-cases, and 8 deaths). A total of 540 patients are hospitalized (127 confirmed and 413 suspected, including 64 children under 5). 17 patients are in critical condition. 212 patients (6 confirmed and 206 suspected) are being treated in healthcare facilities that are not Ebola Treatment Centers (ETCs). 15 out of 17 available ambulances are in use (88% utilization), with 22 calls successfully answered.

• **In Haut-Uélé,** 22 confirmed cases and 38 suspected cases are currently hospitalized in the province's various Ebola Treatment Centers (ETCs). 62 patients, 64 caregivers, and 87 frontline workers received three hot meals (except in the health zones of Rungu, Gombari, Dungu, and Watsa). A HemoCue blood transfusion unit was delivered to the Isiro ETC, and 50 units of blood were received from Kinshasa. • **In Bas-Uélé,** 25 new suspected cases were isolated in health zones (Bili: 2, Buta: 1,
Bondo: 1, Dakwa: 1, Ganga: 2, Titule: 3, Viadana: 2). Eight patients were discharged after laboratory analysis and were declared "non-cases." There are no confirmed cases in isolation.

• **North Ubangi :** In Wapinda, 4 confirmed cases and 15 suspected cases isolated at the Wapinda General Referral Hospital, receiving nutritional support (with the arrival of the partner ATAMECO). And in Yakoma: 2 confirmed cases and 12 suspected cases isolated at the Yakoma Ebola Treatment Center.

Major challenges: Strike by CTE Kasenyi service providers following non-payment and 14 patients not supplied in the Mandima health zone.

2.6. Vaccination

2.6.1. Main actions

- **Ituri:** Continued vaccinations (Ervebo) targeting PPL with the support of MSF. Cumulative vaccination (from 19/09 to 09/11/2026): 3,346 people vaccinated across the various partner health structures (DPS, Elikya, CME Alima, Rwampara, Rwankole, etc.) and Training of registered nurses (RI) from 6 health zones (Bambu, Lita, Mandima, Mongbwalu, Nizi and Rwampara) on the continuity of vaccination via the Mobile Immunization Unit (MICU) approach.

• **Bas-Uélé :** 2,211 people vaccinated in total (807 men and 1,404 women), representing 16.8% coverage of the overall target, with a 95.4% encoding rate on the DHIS2 server. 289 vaccine doses are in stock. Compassionate vaccination continues in Bili and Buta, and pre-registration of PPLs and TPLs (religious leaders, RECOs, traditional healers, motorcyclists, hunters) is underway in the health zones of Bondo and Monga.

• **Challenge:** Risk of expiration/loss of 195 vaccine doses and necessary activation of units
cold chain (UCC).

• **Haut-Uélé** Continuation of vaccination (Ervebo) targeting as a priority Frontline Personnel (FPP) as well as the progressive extension of the target to contacts of less than 5 days, taxi drivers and volunteers in the ZS of Isiro, Wamba, Pawa and Rungu, supported by briefing sessions on the approach of the Mobile Vaccination Units (MVUs).

• **South Ubangi: Preparation and mapping activities:** Identification of health structures and PPLs in border areas with North Ubangi (4 out of 6 health zones have submitted their data): *Bominenge Health Zone:* 5 structures / 89 PPLs *Bogose Nubea Health Zone:* 4 structures / 43 PPLs *Zongo Health Zone:* 7 structures / 116 PPLs
Libenge Health Zone: 12 structures / 723 PPLs **Partial**
assessment: 28 health structures and a
total of 971 PPLs identified for vaccination.

TSHOPO: 13,655 people vaccinated, achieving provincial coverage of 91.3% (with a net remaining 1,305 people to be vaccinated). Other coverage rates include Bafwasende (120%), Tshopo (114.1%), Makiso-Kisangani (111.8%), Lubunga (96.5%), Mangobo (70.2%), and Kabondo (45.1%). Vaccination was also conducted around case 97 (advanced site in Makutano village, Azunu, with 131 people vaccinated), with a remaining stock of 23 doses and an expressed need for 500 additional doses.

Machine Translated by Google

North Kivu: 900 additional doses of the Ervebo vaccine were received in Butembo as part of the BRAVO study conducted in collaboration with MSF-F.

•

2.7. Continuity of Care

2.7.1. Main actions North Kivu : The baseline assessment of the Tulizeni health center highlighted the absence of a standardized triage area, the lack of PPE and staff protection, as well as the absence of a connected water source.
On the administrative and financial side, the payment of the 133 actors of the response of the Oicha ZS for the month of July 2026 has been ensured.

• Tshopo: A total of 68 confirmed cases have been treated, including 3 with MPB134 and 58 with Remdesivir. 614 people received Post-Exposure Prophylaxis (PEP), and 48 hospitalized patients received hot meals.

2.8. Risk Communication and Community Engagement (RCCE)
2.8.1. Main actions

• **Ituri :** Intensified advocacy efforts with local, administrative, and religious authorities (particularly in Mambasa and Gety) to strengthen community support. Thousands of awareness-raising activities were conducted through home visits, educational talks, community debates, and radio spots. **North Kivu:** Intensive mobilization through 2,116 home visits (reaching 72,343 people), 119 educational talks (reaching 99,578 people), mass communication campaigns, and community briefings; 26 out of 36 community infodemics/feedback reports were addressed within 48 hours, although persistent threats from some local groups against response infrastructure (such as in Mangote in the Beni health zone) are complicating the teams' work.

• **Tshopo: Conclusion** of training for members of the provincial CREC sub-pillars (FHI-360) and discussions with youth representatives (Lobbying Groups) from the Kabondo Health Zone regarding their involvement in the response. 44 community alerts notified and resolved (including Mbilinga in the Tshopo Health Zone and Makiso-Kisangani). Processing of community feedback related to rumors (e.g., medications allegedly contaminated with viruses at the Ebola Treatment Center, misappropriation of mattress funds, or vaccination presented as a business).

• **Haut-Uélé:** Intensification of mass awareness activities, educational talks, and home visits conducted in Isiro and Wamba (reaching thousands of people, including church and school groups). Use of local media (interactive programs on Radio Boboto and RTK) to address infodemics and raise public awareness of preventive measures.

•

• **Bas-Uélé:** 15 home visits (472 people reached), 32 mass awareness sessions (5,429 people), with targeted interventions at ISTM Buta, the Natolo Institute (Viadana), and with women from the 14th CBCN in Bondo. Two community alerts were reported and resolved in the Viadana health zone.

2.9. Mental Health and Psychosocial Support (MHPSS)
2.9.1. Main actions

Ituri: Management of 33/44 latest confirmed cases and 53/89 new suspects of the day, support of 182 companions and 73 PPL, as well as monitoring of 12 children in daycare.
Tshopo: Monitoring of 100% of new confirmed and suspected cases of the day, support to 2 households for public health actions, support to 7 people living with HIV, and 1 recovered patient monitored in the community. Management of 2 community resistance outbreaks.

North Kivu : Coverage of 20 out of 24 new confirmed cases (83.3%), support to 68 frontline personnel (PPL), and facilitation of psycho-educational sessions for hundreds of people with the support of UNICEF.

Haut-Uélé: Care and monitoring are underway for confirmed and suspected cases in the facilities, as well as active support for the 473 PPL and dozens of caregivers and affected households.

2.10. Logistics
2.10.1. Main actions

• **Tshopo: Lack** of means of mobility (increased need for motorcycles for field teams) and fuel constraints for critical infrastructure.

Machine Translated by Google

- **Bas-Uélé:** Packaging of PCI and PEC inputs is underway. Rehabilitation work is in progress at the DPS (meeting room, hygiene and teaching offices supported by WHO). Major needs have been identified for computer equipment (computers, printers, scanners), fuel (0 liters of diesel in stock) and means of transport.

2.11. Security

2.11.1. Main actions

Bas-Uélé: Calm situation (Nothing to report), but teams note the absence of guard posts at secure sites exposing guards to the elements, as well as a lack of mobility for the pillar.

Tshopo: Insecurity and persistent threats against response teams in certain areas (notably in Bafwasende, Kabondo and Mangobo).

2.12. PSEA (Prevention of Sexual Exploitation and Abuse)

2.12.1. Main actions

- **North Kivu :** Receipt of PCI and EDS inputs provided by AFENET, and monitoring of the incinerator works at Katwa General Referral Hospital. Fuel support (280 liters) provided to the Beni Health Zone surveillance by FHI 360
- **Haut-Uélé:** Continued briefings and awareness-raising on the code of conduct, prevention of sexual exploitation, and the reporting mechanism (via hotlines and focal points) for healthcare providers, community structures, and travelers at checkpoints

KEY MESSAGES

Eighty-three (83) new confirmed cases were reported in three provinces, including 37 in Ituri, 41 in North Kivu and 5 in Haut-Uélé. The transmission remains particularly pronounced in the ZS of Mandima (11 cases), Mangala (15 cases) and Bunia (4 cases) in Ituri, as well as than in that of Beni (14 cases) in North Kivu.

Of the 38 confirmed deaths reported, 28 are deaths community-based (9 in Ituri, 17 in North Kivu and 2 in Haut-Uélé) and 10 These are deaths at the CTEs (3 in Ituri, 7 in North Kivu). The follow-up rate Contacts were established at 80.9% (31,255/38,645) in the five provinces with contacts currently being monitored (North Ubangi: 100%) ; South Ubangi: ND; Haut-Uélé: 84.6%; Ituri: 83.5%; North Kivu: 77.9%; Tshopo: 83.1%, down from the previous day (85.5%) but still below the 95% threshold, with the lowest rate at North Kivu.

TIMELINE OF KEY EVENTS

From April 24 to May 15, 2026, the epidemic is moving beyond the detection of the first cases suspected of having the virus confirmed by biological testing Ebola Bundibugyo, leading to the declaration official of the 17th epidemic of Virus Disease Ebola in the Democratic Republic of Congo.

Between May 17 and 18, 2026, the authorities national, with the support of partners, have strengthened the response with the declaration of the public health emergency of scope national and then continental, accompanied by
